

**PATENT 7: BUSINESS METHOD FOR HYBRID WIRELINE WIRELESS NETWORK
SERVICE**

ABSTRACT

The present invention is a method of doing business where a wireline telephone company provides
5 wireless telephone communication through a telephone network. The method includes a wireline
distribution providing a plurality of telephone signals over one or more wireline connected to one
or more network nodes in wireless communication proximity to one or more telephone users and
responding to requests from one or more wireless devices for telephone network attachment
through a wireless communication with the network node devices.
